

MUHAMMAD ZEESHAN AMEER

MERN Stack Developer | React.js • Node.js • Express.js • MongoDB

Lahore, Pakistan | +92 328 6459508 | zeeshanameer576@gmail.com

github.com/zeeshan92git — linkedin.com/in/muhammadzeeshanameer

PROFESSIONAL SUMMARY

Software Engineering student building full-stack applications with React, Node.js, Express, and MongoDB along Next JS. Hands-on experience with REST APIs, authentication, appointment workflows, payments, and deployment. Integrates AI capabilities through document question answering, RAG, and vector search.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3

Backend and Databases: Node.js, Express.js, MongoDB, REST APIs, JWT, role-based access control

AI Integration: Python, FastAPI, LangChain, RAG, Hugging Face embeddings, Qdrant, Groq

Tools and Deployment: Git, GitHub, Postman, Vercel, Railway, MongoDB Atlas, Cloudinary, Stripe

EXPERIENCE

MERN Stack Developer Intern — Developer's Hub Corporation | May–Jun 2025

- Developed React interfaces, integrated REST APIs, and implemented MongoDB database operations while debugging frontend and backend issues in MERN applications.

MERN Stack Trainee — Nexus Berry Training & Solutions | Jan–Apr 2025

- Completed practical MERN training and built a doctor appointment platform with authentication, booking workflows, dashboards, and API integration.

PROJECTS

DocCure — Doctor Appointment Platform — [/github - repo](#)

React.js | Node.js | Express.js | MongoDB | Stripe

- Built patient, doctor, and administrator workflows with authentication, profile management, doctor availability, appointment scheduling, and cancellations.
- Integrated Stripe test payments; deployed services on Vercel and Render using MongoDB Atlas and Cloudinary.

AI-Powered RAG Application — Document Question Answering — [/github - repo](#)

Next.js | FastAPI | LangChain | Hugging Face | Qdrant | Groq

- Built document upload and question answering across PDF, DOCX, TXT, Markdown, and CSV using chunking, embeddings, vector retrieval, and LLM generation.
- Added streamed answers, source references, and a document viewer for checking supporting passages.

Jewels For Joy — Jewelry E-Commerce Website — [/github - repo](#)

Next.js | React.js | MongoDB | Tailwind CSS

- Built a responsive jewelry storefront with a product catalog and category filtering for mobile and desktop users.
- Developed administrative workflows for managing product inventory, updating prices, and tracking orders.

Shopzy — E-Commerce Interface | React.js, Vite, Tailwind CSS — [/github - repo](#)

- Developed responsive product browsing, category and price filters, product detail pages, grid/list views, pagination, and reusable UI components.

EDUCATION

BS Software Engineering — University of the Punjab (FCIT)

Sep 2023 - Expected 2027 | CGPA: 3.46/4.00 | Lahore, Pakistan

CERTIFICATIONS

Frontend Developer (React) — [/HackerRank](#) | Javascript Certificate — [/HackerRank](#)

Crash Course on Python — [/Coursera](#) | Introduction to Git and GitHub — [/Coursera](#)
